AMBERLEY WOODS

When Residential Homes of America (RHA) set out to acquire the historic Blithefield Estate in Lake Forest, the company had a vision to transform part of this land into a beautiful maintenance-free neighborhood. RHA is realizing this vision now, with a design that preserves the wooded surroundings with stunning condominiums that are architecturally pleasing, incredibly well appointed and that represent an almost unheard of value for new construction in this area. Construction on the Amberley Woods Condominiums is moving along on schedule, with the first deliveries slated for spring of next year. The winding streets surrounded by rich natural beauty where deer are known to frolic gives this community a special feeling. What sets these condominiums apart is that they provide the ability to purchase new, maintenance-free condominiums in amazing surroundings.
